

# SMART AUTOMATION

start controlling your ...

and, even your ...

- Easy to use app
- Basic visual interface
- Smart scenario & automation settings
- Multiple places (i.E. Primary+ holiday house)
- Setup various locations within your home
- Allow user rights (ie tenant or friend visiting)
- Transfer your control when selling your home
- Push notifications
- Control multiple devices
- Retrofitted to existing electrical installations

**WHERE** • Scenarios • Room Allocations • Multiple Locations • Voice Activation Applications

## reasons to automate your home with a touch of a button

- Buzz late guests in with a touch of a button
- Forgot to turn the geyser or pool/irrigation pump off after leaving the house - no problem
- Left garage door open after leaving - close it remotely
- Turn your central heating on and off
- Switch lights off or on remotely
- Intruder alert? Activate lighting and loud siren from your APP
- Control your bathroom or cellar extraction fan to ensure air flow
- When armed response needs access remotely switch the lighting on
- Energy management system for load profiling and monitoring (independent system)
